Subject: Application for Software Engineer Intern Position – Job ID 451573

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer Intern position at Siemens Industry Software SARL, as advertised (Job ID 451573). As a second-year Computer Engineering student at the National Engineering School Of Carthage, with a keen focus on software development and a passion for innovation, I am eager to contribute to Siemens' legacy of engineering excellence and forward-thinking solutions.

Throughout my academic journey, I have developed a solid foundation in programming languages such as Java, C++, and C#, alongside practical experience with SQL and NoSQL databases. I have applied these skills in various projects, including a client-server flight reservation system built in C using TCP sockets, and an Android-based application for spectacle booking, where I integrated REST APIs, dynamic UI components, and real-time data filtering.

What draws me to Siemens is your commitment to quality, diversity, and continuous innovation – values I personally embrace. I am particularly enthusiastic about the opportunity to work under the guidance of experienced engineers, where I can apply and further develop my skills in software design, implementation, and testing. I am confident in my ability to quickly adapt, learn new technologies, and contribute meaningfully to your projects, thanks to my strong problem-solving mindset and collaborative nature.

I would be honored to join Siemens' dynamic team and contribute to impactful projects that shape the future of technology. Thank you for considering my application. I welcome the opportunity to further discuss how I can support your team's goals and grow with Siemens.

Sincerely, Ghalia Benaïssa
